

*“Our number one issue prior to moving to RFID was code and clicker management. With Radiant's system this issue has been eliminated while also saving money.”*

- Angela Thielemans  
Community Association Manager  
RealManage

### CHALLENGE

The proliferation and easy transfer of gate clickers and access codes affects the safety and security of people, homes, property and vehicles in your community or facility.

### SOLUTION

Radiant RFID's access management solution consists of industry standard Gen 2 passive RFID tags for personnel and vehicles, gate control hardware including environmentally protected RFID interrogators, and proven reader-based software for reliable performance.

Grant employees and approved visitors entry into your gated facilities without the use of codes or clickers while maintaining greater control and security.

### BENEFITS OVERVIEW

- Peace of mind with greater access management control
- Faster access for employees, residents and visitors
- Web based permissions management for individual tags including time and day access
- Control access for contractors and visitors with temporary tags
- Protection from false claims with entrance/exit reports
- Tracking of all tagged access, not just the first one through
- Manage site traffic by directing visitors or employees to specific entrances
- Enhance security with built-in support during temporary network and power outages

### TECHNOLOGY HIGHLIGHTS

- Web based solution with user-friendly interface
- Combines vehicle, employee and vendor validation into one system
- Robust outdoor system
- EPC Gen 2 compliant system
- Open architecture system is easily expandable
- Integrated system status monitor
- Universal gate interface module
